

# NumBugz<sup>®</sup> Rules

## Memorize

Memorize is a game that really tests your memory – it's harder than it sounds!

**Aim of the game:** To find all 25 Bugz in your set

**Players:** Can be played by 2 people, but better with 3 or more (up to 6)

**Starting the game:** Each player chooses a full set of Bugz and places them **number** face up on the table. All the Bugz are then randomly mixed together and moved around so that no player knows which Bugz are theirs. The youngest player starts the game by flipping over one of the Bugz. If it is one of their Bugz, they place it in front of them, **Bugz face up** and start to create a stack of 5 Bugz. They continue flipping Bugz but if they flip an opponent's, it is flipped back over and the next player (clockwise) takes a turn.

Once you have started a stack you cannot re-look at the numbers on the Bugz in your stack.

Once you have completed a stack of 5 Bugz, start building another stack.

**Winning the game:** The first player to find all 25 of their Bugz and create 5 stacks wins the game – the secret to success is remembering what you and your opponents have already found
