

Heat Seeker Rules

Aim of the game:

Use your investigative skills to taste the chilli cards and locate all of the **hottest**

Players: 2 to 6 players

Taste the chilli: Shuffle all the chilli cards together and deal them amongst the players face down. Each player should have a paper and pencil to help their search.

- Each player lays out their chilli cards face down in a row(s) in front of them,

and has a look at their own set taking note of the location of any cards

- The cards can't be moved from this moment.
- The player to the left of the dealer begins tasting by asking for a sum of 2 or more of an opponent's cards – simply by pointing to the cards they want to know the sum of. The opponent looks at the cards, still keeping them hidden and shouts out the total.
- The next player (clockwise) does the same and so on
- Record everyone's tasting to help narrow down the options

Winning the game: At the start of your turn, if you think you know the location of all 6 of the hottest chilli cards on the table, state where you think they are.

Your opponent(s) will tell you whether you are right and if you locate them all correctly, you win the game. However if you're wrong you lose your turn and by revealing your guess you will have helped the other players.
